KEEP DATA CENTERS OUT OF NM!!! As a born, raised, citizen: I love my state, from the bottom of my heart. From the breathtaking sunsets/sunrises, to the set-in-awe views from this beautiful plane (mountain, rivers, animals, etc.) to the people and families allowing the metro area to keep running. But, if there is one thing that I cannot imagine "fitting in" with everything we all know and love, is the direct cause and effect of putting a water guzzling, massive production of heat, noise pollution, and an insane reduction in fertility rates in wildlife, livestock, etc. Why? This is because as of right now, our infamous Rio Grande is already drying up, and on top of that, our rains are shorter than I've seen any other year I've lived here. The installation of a data center would make the water we do get to our HOMES, WELLS, REFRIGERATORS will be DIRTY. The HEAT has ALREADY caused med to high Fire Hazards. DO NOT ACT OBLIVIOUS AS IF YOU DO NOT SEE HOW THE CONS SEVERELY OUTWEIGH, OUTNUMBER AND OUTPOPULATE *any* "pros".

Air quality is not the only thing in danger here.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.
