

August Moore

It doesn't matter if we say that we do not want this, because you are already heading full steam into sending the world into climate disaster. Despite your promises, just like any other data center you will break them and then do nothing to fix the ensuing damage you have done. We have seen it all before, you have not fooled us. You disgust the residents of this planet with your corporate greed and disdain for life. Stop this project, shut it down, we do not want it.
