

Sandra Nemeth

I am against the Project Jupiter Data Center and all of its attempts to get certification for energy sources. I live with Chronic Obstructive Pulmonary Disease. Ozone and particulate matter in the environment create conditions where I am unable to even leave the house. The project that they are trying to get approved will increase these environmental hazards. To cause New Mexicans to be unable to even breathe the air is criminal. Please deny their application.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
