

Pieta Bunker Ruiz

With the droughts and wildfires so prevalent in New Mexico, Project Jupiter will only exacerbate our problems. Instead of focusing on a data center that helps millionaires profit, let's focus on the well being of New Mexico residents. Let's prioritize keeping NM green. The government has proven time and time again that they do not care about New Mexico as a state and New Mexicans as people. The last thing we need is a giant data center that sucks up all of our water and perpetuates the cycle of hierarchy regarding socioeconomic status. New Mexico is my home, I do not want to live in a dry, desolate, and depressing state that Project Jupiter is responsible for.
