The climate clock has 3 years left until we are unable to turn back, unable to fix our world. Why would it ever be a good idea to build and initiate a building that horribly worsens the world chemical output and well as climate change. There's no control on this, the chemicals outputted will harm people tremendously, this data center is killing ecosystems where it's built, and there's simply no reason for this to be built either way. This centre is only a way for people to make money, for profit to be earned, and it doesn't have the world's interest in heart which should be any companies main priority. Stop this projects motion, help save our planet instead of worsening it to no return. You cannot eat money, you cannot live off of money forever. We need our planet, we need her to be healthy. So build something that helps against climate change/greenhouse gases, use the millions of dollars that will go into this project for something that will help protect our planet. There's no control on what exits the plant, there's zero idea of what this is going to do to our world. There's will be 10 MILLION tons of CO2 gas put into our atmosphere, that will kill us. Kill our planet only for money. As well methane gas is one of the biggest contributors to climate change, world ending climate change, but this company thinks it's a good idea to output large amounts of this into the area. As well as a plant this size is simply not needed, in no world is a plant 10x the size of the current biggest needed. That's excessive and doesn't at all take into account the ecosystems around it. STOP THIS PROJECT, SAVE OUR WORLD. -Kori

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
