

Addison Duke

I live in unincorporated west palm beach near the entrance of Corbett. And already near where I live we are having small drought every so often. I have lived here most my life (11-12) years and I am 15. This is my home, and many other families homes. We need the water utilities and if these data centers keep coming we are going to have no water left. We do not need ai to survive we need water. Please if there is anything I can do to help this data centers keep coming get mainspread and get signatures to shut down I will do it.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
