

Taya Handfield

Do not go through with Project Jupiter. We don't need more data centers, we need to be taking care of the environment. Every year its getting hotter and hotter, the air becoming even less breathable, with the way things are going, we will never be able to keep up with our sustainability for future generations.

New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
