

Geneva Sandoval

Dear NMED, Environmental Improvement Board. Let me say that one more time... ENVIRONMENTAL. IMPROVEMENT. BOARD. Just as a quick reiteration of your very existence. I am writing to you strongly, vehemently and desperately asking you to deny Yucca Growth Infrastructure's Air Quality Permits.

Project Jupiter's estimated emissions are going to be 10 Million TONS of greenhouse gases and air pollution a year. New Mexico's three largest cities (ABQ, SF, LC) COMBINED only emit around 8 Million. Think about that for a second please. Not only would that make a laughingstock of our states progress toward our 2030 goal, it would SET US BACK years. Yes, yes, "jobs," "economic benefits," they say. Please explain to me... WTF is the point of jobs or economic boost if our air is UNBREATHABLE??? I'm just confused why anyone could every justify how this project is a good idea and worth it for the awful deal the developers are giving. In no world can you as the EIB justify approving these permits, no matter how you try.

Board, I would also like to emphasize that Data Centers across the country OVERPROMISE, UNDERDELIVER, and LIE about the so called job and economic benefits. Project Jupiter has already changed their job numbers over 6 times and their water usage numbers twice. Please explain to the public why on Earth we are trusting Billion dollar tech corporations who HAVE EVERYTHING TO GAIN by lying to us????? Because that makes all the sense in the world-- you would think as our local governments we would have some pride and dignity.

LOOK IT UP. Find the research and the studies. In another area, the data center deliver TWO PERCENT of the "promised jobs." Across the country, the infrastructure and community promises that were made, NEVER HAPPENED or were enforced. By approving these air permits you are essentially taking the money from these corporations and sacrificing our air, land, water and health.

Some last points to make are that the plan proposed for the Bloom Energy cells (not to mention Bloom is proven to be scandalous and shady and was a dying company before this life saving deal) has NEVER BEEN DONE AT THIS SCALE. We are guinea pigs. I can GUARANTEE that if this was proposed in YOUR background, next to YOUR children's schools, you would be voting no unanimously. Am I right?

P.S. Project Jupiter is out of compliance with their job reports- requirements for the IRB bonds. They have ALREADY BROKEN THEIR CONTRACT ON SEVERAL OCCASIONS. I ask again... WHAT!!???? They are also continuing construction without the LEGAL permits. Just tell us this is already set. Stop the the song and dance clown show. its insulting to your constituents- you have to feel some guilt, some inkling of guilt about how wrong this is.

It was found out that the County was not even all on the same page and some Commissioners were completely unaware of what was even going on, even being told different numbers. They basically got completely duped or paid off.

The cherry on top, are the FRAUDULENT bot and unauthorized comments that are flooding into this portal by the minute. Some of these names DO NOT EVEN EXIST. I ask again what you will do. Thanks for listening to my TedTalk that provides FACTUAL EVIDENCE for why this entire

project is bogus, illegal, and totally untrustworthy.

Once again, I reiterate how this project will be DISASTROUS for DAC, as well as our state. It is not an investment or growth. It will RUIN us. Just so you all can make a quick buck.

I'm sure it's already a done deal, unfortunately. Shame, truly. I hope your children ask you one day why and how the state turned into what it did. Polluted, unlivable and with NO WATER. Oh, but we got 50 jobs for out of state people for 10 years :) Great Deal!! This project will not keep people here, it will make them MOVE AWAY and OUT of the state. We know you know it too.
