Say no to Project Jupiter! Data centers poison the land and people surrounding it while using critical resources better left for ecological balance and responsible human community use. Ask yourself: who does it truly benefit to build and have data centers? Short term gains/ profits while aiding and abetting corporations and billionaires does not scale or translate to true community and environmental benefits for generations to come.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
