This Jupiter project will not bring any good to anybody. Many states in the west are already in a drought including New Mexico and this will only dry it out more please think of the people. They can't drink money you can't drink money we can't drink money but we can drink water and help reserve what little we have.

New Mexico Environment Department should give the public an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
