

Linley McEvers

Data centers are the most detrimental thing to our environment. my future kids deserve clean water and fresh air, as do everyone else's. the people who are living right now and working, paying taxes, fighting our wars, and making our decisions; they deserve clean water and fresh air. Ai is the worst thing to come into the publics hands and should be extremely regulated and should stop being downplayed. Stop taking our land to give it to an inanimate source of knowledge that wouldn't know anything without us. Ai is making art while we are working our lives away in factories and corporate jobs, when should that ever be the case? STOP MAKING DATA CENTERS! REGULATE AI USAGE! SAVE OUR PLANET!!!
