

## Alexa Kuivanen

I may not live where the data center is being put, but I have enough empathy and situational awareness to know this is unethical, unneeded, and unacceptable. It is cruel to the people that have lived there for generations not only that but the entire world. 10 millions tons of carbon being dumped into OUR atmosphere is so astronomically detrimental I cannot even imagine it. You gamble with the lives of all that live there and that alone is a complete defilement of the authority vested in you.
