

Chloe Holdren

We do NOT need ai, we NEED water!! We NEED renewable energy, we do NOT need another nonrenewable energy source, especially on this scale! Please, stop! It's only june and our community itself is already in stave 3 drought, I can't imagine what a data center as large as project jupiter would do. The CO river is struggling to keep up, the demand something like this would caught will ripple to ask for states dependent on this river. It's beginning to eat up our planet. Please, I beg that you stop! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste!! If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. * Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.
