

Fatimata N'diaye

Project Jupiter is completely uncalled for and not needed. We need to be using our time, money, and effort into saving the planet not destroying it further. What benefit is this going to have in the long run? I just don't understand why corporations and governments are dead set on ruining things for their citizens and this planet. The permit application needs to be denied and a hearing needs to be held in both English and Spanish and an option to attend virtually, so all the people who will be affected can participate.
