Data Centers pose great risks to our environment and the community. New Mexico is a beautiful state, which collected \$8.8B from tourism in 2024. Project Jupiter will tear away from the natural beauty and resources that New Mexico is blessed with. The benefits of the data center cannot outweigh the charm and character that the state was built upon, and that millions every year visit to witness. The New Mexico community already faces a disproportionate amount of environmental pollution- and to exacerbate that would be a step backwards. Governmental systems were put in place to help support and protect the citizens rights, and to improve safety and living conditions. The approval of this data center would equate to the complete opposite. I urge that the needs of the current citizens and future generations are put first. "Only when the last tree has been cut down, the last fish been caught, and the last stream poisoned, will we realize we cannot eat money."
