

Stéphane Luchini

I absolutely do not support this project. The people behind this do not truly care what the community wants. They are using methods to get their way without regard for what people want and need.

Seems like they want to use water to coop their machines. There are alternatives that dont use water. They just care about profit and wan the cheap alternative which passes the long-term cost on to us.

I urge the New Mexico Environment Department to not approve this important project.

Sincerely,
Stéphane Luchini
