

Natcely Cardenas

I recently traveled through new mexico, from dona ana to Colorado, along the way we saw a lot of project Jupiter representatives claiming to have a petition for cleaner water and air. You have to read the fineprint to see its really to help push project Jupiter through, and their representatives are obviously lying. This document and the ones presented by project Jupiter look extremely similar, as a heads up that they are trying very hard to manipulate their plans to go through. I have asthma and breathing problems run in my family. I also happen to be human so clean drinking water is a little necessary to me. Actually a lot necessary i happen to die without it.
