

Alex Coulson

I strongly oppose the building of the oracle and open ai data center in dona ana county. project jupiter threatens our water and air and has already destroyed large swaths of valuable land despite not being approved on all of there permitting. This area is already notorious for having below average air quality. Approving this data center will have irreveresable effects in the health of communities and surrounding eco systems. We need you to deny the air quality permit for the health and safety of our water, air, land, and people. DATA IS NOT MORE IMPORTANT THAN THE HEALTH AND WELLNESS OF THE COMMUNITIES WE LIVE IN! PERIOD None of this is even getting into the history this company has related to illigal dumping. This leads me to belive they will skort the laws even if they do get an approved permit. we have zero reason to trust that this project is toing to provide more benefit than harm.
