

Sherry Hulsey

I walked out my front door this morning to HOT grey air. The thought of allowing a for-profit business permission to make our air even worse is distressing, disgusting and ridiculous! I love living in southern New Mexico and want the best for it. You already know the facts, You know how vulnerable our environment is. Take the right action...protect our people, our wildlife our future--deny Yucca Growth Infrastructure's air quality permit. It is time to do the right thing!!!
