Why would building YET another data center be critical to human survival...? ITS NOT. We've lived YEARS AND YEAR AND YEARS without AI assistance, and yet now it's crucial to build a data center everywhere??? It's actually irritating that someone can care so little about the planet they live on when there is HARD EVIDENCE that climate change is a true issue, animal extinction is a true issue, water pollution is a true issue, A SCARES OF WATER IS A TRUE ISSUE. How do you expect to live on this planet when it becomes TOO HOT, NO WATER, NO BALANCE WITHIN OUR ECOSYSTEM. The lack of empathy for your fellow humans is DISGUSTING and you should be ashamed that money is more important than not only your life but BILLIONS of other people's lives.
