

Charlotte sargent

I live In Hampton, Georgia, and I wish to grow old in a world that has a healthy environment. I wish for my future kids and kids around the world to be able to go outside and drink in fresh air like I was able to do when I was young. Project Jupiter intends to build this AI data center which will strip away this opportunity for all our future generations. They will not be able to play outdoors without worrying about the damage it will have on their young bodies. Stop building AI centers!!!!
