

Hannah Driscoll

Allowing this data center to be built will be catastrophic for the environment not only in New Mexico but all around the world. This data center will consume an enormous amount of clean drinking water and will release a significant amount of greenhouse gases that will negatively affect our environment. There is no reason for another data center to be built. We as a society have no reason to continue harming the environment.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
