

Erika Wilson

The government and related agencies are here to support the environment and people who live here. In NM, that has been blatantly ignored in the name of capitalism and corporate interests and this is a fast track to harm every person, animal and plant here in the state. This tends to concentrate in already impacted communities as this is exactly what would happen with this permit in relation to the Doña Ana county inhabitants. This is environmental racism and it is not subtle. Among a myriad of other reasons, this air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.

Prove to the people of NM you care. This is your chance.
