

Luka Anonymous

Dear NMED staff,

My name is Luka. I am a New Mexico resident, living in Santa Fe, and I am writing because I am concerned about the risks and harms Project Jupiter poses to New Mexicans. I am submitting this comment to urge the New Mexico Environment Department to reject Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid in Doña Ana County.

I worry for our Earth's future as we have limited time to act and prevent global warming and climate change. There is only one Earth. These data centres are a waste of space and interfere with people's lives and animals and ecosystems. They should not be built.
The project's proposed fuel cell powered grid is concerning for many reasons:

It would still produce a high level of greenhouse gas and toxic pollutants
This technology generates toxic waste, and the process for handling this waste is still unclear.
Fuel cell technology or a centralized waste system has never occurred at this scale.
Surrounding communities' air will be negatively impacted by this development.
I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology.

Sincerely,

Luka
