

Sol Dean

This would be a political and environmental disaster lets be honest with ourselves. Oracle is owned by the Ellison family, the largest private donors to the IDF (IOF). They don't see us as people, they don't see nature as worth anything besides a smash and grab conversation into their bank account. They don't care about "jobs" thats all fake PR speak. They want to steal our land and water and they want to subjugate us, be honest. If this goes through New Mexico will never forget the politicians who stabbed this land and its people in the back.
