

Clodagh O'Farrell

I am from Ireland and you may think this isn't going to affect me but no it will it's not going to just affect nearby residents but the whole world we have 3 years left to reverse Climate Change or else we are pretty much doomed and you are trying project Jupiter Ai used millions of tons of fresh clean drinking water that is needed for people and ecosystems and you're wasting this all because of your need for more Ai and 10 million tonnes of carbon dioxide is going to destroy this planet. We don't need more ai we need genuine compassion from people when the world is ending and there's no food or water left you can't eat your money.
