

Zoey Li

I would like to say that I think that this is a HORRIBLE idea. We already know that Bloom dumps hazardous waste and has a history of illegal dumping, and letting them build something of this size is just a horrid idea. Furthermore, I'd like to point out we are already past the 1.5 C agreement of global warming (Paris agreement), dumping more carbon into the atmosphere would increase temperatures even further. This data center is a horrible idea to the people of New Mexico, making their air quality worse as well as the fact a data center this huge is bound to make a ton of noise. Straight noise pollution. As a concerned citizen, this just should not happen.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
