Please reject project Jupiter. This is in no way good for our state. This is becoming a race to the bottom and the outcomes will be disastrous. Data centers for profit are damaging for the environment and state. They are siphon wealth and resources out of our land and communities.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste.

If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.

Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.
