

Dear Members of the Environmental Board,

Please accept this comment in support of Project Jupiter.

Throughout New Mexico, communities are working to attract employers that provide stable, family-supporting jobs. Investments like Project Jupiter help build confidence in our economy and encourage additional businesses to consider New Mexico as a place to invest. Those opportunities ultimately benefit workers, local governments, schools, and small businesses throughout the region.

For these reasons, I respectfully support approval of the project's air quality permits.

A handwritten signature in black ink, appearing to read 'Francisco Arroyo', with a stylized, cursive script.

Francisco Arroyo
