

Nicollette Ortiz

I completely disagree, protest, and disavow ANY form of AI data center being built in New Mexico. The negative impact of these centers in the communities they are built in has already been seen across the nation. We must keep New Mexico clean and our water flowing, and it's already hard enough in the desert to that, but this data center would KILL that possibility. We must protect our state from greedy corporations seeking to make a quick buck without giving even a thought to the communities it's putting on the chopping block. Keep data centers out of New Mexico!
