

Ian Spangler

My name is Ian and I would like to say some things about this stupid data center being built in New Mexico. No I don't live in that state, but I do wanna support the people that'll be affected by this decision Sam Altman & Larry Ellison are currently proposing. From what I've heard, this will be the largest data center built in the country & I assume will be bigger than Kevin O'Leary's data center which I wish both would never happen. Data Centers affect the lives of many people who just want to live without this affecting their water supply, electricity & bills for their necessities. I know this paragraph is a little weak in sentences, but this is what I'll say for the people not just in New Mexico, but in every state in the United States. FUCK ORACLE FUCK THE ELLISONS
FUCK OPEN AI FUCK SAM ALTMAN (Sam Altman has also been sexually assaulting his sister when he was young just to let you know) FUCK DATA CENTERS FUCK AI
