

Stephanie Wolf

I strongly oppose permitting Yucca Growth Infrastructure, LLC-YGI's Microgrid Air Quality Construction Application. There is irrefutable evidence that similar projects have devastated communities that possess far greater resources than New Mexico can possibly imagine. These applicants have engaged in deeply unethical and even fraudulent acts to manufacture approval in our state. New Mexicans deserve so much better than what this company has on offer. We will NOT forget if you choose to sell our collective future. We will also remember if you stand

**firm in what is best for New
Mexicans. What side of history do
you see yourself on?**
