

# Sol Noir

I am writing to express my disapproval for Project Jupiter.

Oracle was created by Larry Ellison in the 1970s for the CIA, which has been invading our privacy. Oracle has also been collecting data and using it to train AI defense systems, used by Israel in its genocide in Gaza. He has lied before and he will do it again. Where exactly is the money coming from? What are fuel cells? And why should we believe he wont leave the county in a worse off place than before?

By supporting this project, we are supporting the genocide of a people.

I hope this doesnt happen.
