Please don't follow through with this. I am a student and I am watching the effects of data centers and AI usage directly from my home. I have severe asthma. As data centers use up our clean water, the environment gets drier too, affecting air quality. Data centers disrupt nature and wildlife because of the noise and water usage. We are already in a literacy crisis as people are devolving in intelligence, relying on AI chatbots for basic instructions and logic. Please don't take our words for granted. I am a person, someone's child, just like you. I have dreams, and I feel that you aren't hearing your community, that YOU'RE supposed to be a part of.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
