

Akuany Kur

I am a resident of Phoenix in Arizona and I oppose Yucca Growth Infrastructure's air quality permit. The massive data center costs Americans their air quality and water. As an Arizonan, my state is currently facing the effects of data centers and I ask that New Mexico does not create issues for their residents. The public should get at least 60 more days to review the permit. There are not enough regulations to prevent climate destruction due to AI and giving Bloom Energy green light would be allowing more government-funded environmental racism towards the residents of the Doña Ana County.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
