

Rory Shroyer

I am still so young and have so many things I want to do in life. I have so many hopes and dreams for my future. I want to live that future. I want to live in a future where I can achieve my goals without worrying about my livelihood. I want to live in a future where the earth is not dying all around me. I want to live in a future where other people are intelligent and not addicted to using ai for every single question they have. I want to live in a future where children can grow up without being fed brainrot, cheating in school with ai for everything ever, and without any worries that a machine will take their job and passions away from them. I want to live in a world where nature is thriving. Where animals get the resources they need. Where I can turn on my faucet and see clear, running water. AI data centers are taking this future away from me and millions of other Americans. AI data centers are taking away human autonomy. Greed is going to get us killed. The greed of whoever is behind all this. The greed of the people making it happen. Greed is going to be the death of humanity. Greed will take and take and take until there's nothing left. Until there's no future.
