

# Jorge Caudillo

Dear Chair and Members of the Board,

Project Jupiter has the potential to become an important economic driver for Southern New Mexico. Beyond the direct employment opportunities, projects of this scale support entrepreneurs, local suppliers, professional service providers, and small businesses that depend upon a healthy regional economy.

I believe this investment will create benefits that last well into the future, and I respectfully support approval of the air quality permit applications.

Thank you for your consideration.  
Jorge Caudillo
