

Eleanor Kerbleski

I am deeply concerned at the fraudulent and copy-pasted comments available on this project. There have been outspoken New Mexicans that have said their emails are used without their permission to support this project.

I am deeply opposed to this project. The emissions created and water used to maintain such a center violate the principles that New Mexico stands behind. We cannot have a data center like this while our river runs dry. It's irresponsible and short sighted. I urge the cessation of this project.
