

Sad'e Henderson

Please reject the air quality permit for Project Jupiter. This data center is not what the people want nor need. Data centers have wreaked havoc across the country causing immense water, air, and noise pollution. Are lands have already been stripped of enough resources and are being stressed beyond repair. Please make do not contribute any further into the distraction of our future. The people of New Mexico deserve their right to peacefully life.

"The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually."
