

Faith Anon

I am 17 years old and i have dreams about living in a world where we don't over consume and take land from other life forces for profit. Before we existed the world has been able to take care of itself and move with its own pace. Now that we've evolved and man has made the world run on money it's quite literally killing us softly. The earth has never needed us, we need the earth. Our bodies are 80% water, why profit off of something we can't live without? We aren't the only ones that need to survive, the animals have to survive too. You people with money and power have been nothing but greedy and parasitic and the thought of having money and power has you blind sighted so much to the point where you don't even take the next generations of life into consideration. take a minute to ask yourself, where does all the power and greed take you after death? I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. Sincerely, Faith
