I AM ACTIVELY AGAINST PROJECT JUPITER. I SHOULD'NT HAVE TO SAY FUCK AI, BUT FUCK AI! It has no societal value or benefits. IT RAPES OUR LAND OF PRECIOUS RESOURCES LIKE WATER. The noise pollution can cause psychosis. Not to mention air pollution. It's bad for the planet. It's bad for people. It's terrible for the environment. WE THE PEOPLE DO NOT WANT ANY AI DATACENTERS. The project's proposed fuel cell powered grid is concerning for many reasons: It would still produce a high level of greenhouse gas and toxic pollutants ~This technology generates toxic waste, and the process for handling this waste is still unclear. ~Fuel cell technology or a centralized waste system has never occurred at this scale. ~Surrounding communities' air will be negatively impacted by this development. I urge the NMED to outright reject YUCCA Yucca Growth Infrastructure, LLC's air permit application for the YGI Microgrid. I ask the department to please hold a bilingual public hearing near the Santa Teresa community, so that residents can learn about the risks associated with fuel cell technology. The mission is "to protect and restore the environment and to foster a healthy and prosperous New Mexico for present and future generations." Granting these permit applications is a direct contradiction to that mission. Project Jupiter's power plant will release up to 10 million tons of climate-warming greenhouse gasses every year.
