

## Scarlett Dooley

We are already in a drought and we are should be limiting water usage this data center will only make the problem worse, data centers do not need to be built in our communities at the risk of our land, water animals and people.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
