

## Madi Davis

Our earth is already dying enough. People are struggling and it's already getting into well over 100 degrees in Illinois. This project will release millions of carbon gasses in the world and eventually become irreversible.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
