

## Amy Larsen

Dear NMED,

I'm providing a public comment in opposition to the permit application for "Yucca Growth Infrastructure, LLC-YGI Microgrid Air Quality Construction". As a lifelong resident of New Mexico, I have concerns about the impacts to the environment that this project may generate. In addition to the water consumption that Project Jupiter will require - water that will deplete our already overallocated Rio Grande basin - there is also concern about how energy will be supplied to the project, and whether that will further impact our air and water quality as well. As far as I can tell, the developers have not answered basic questions or concerns posed by the local community or state residents. Please reject this permit until these concerns have been satisfactorily addressed.

Sincerely,

Amy Larsen

resident of Espanola, NM
