

Chrish Rivero

We do not need another data center!! We can live without AI, if we did it before why can't we do it now? I'm still a highschooler, and I cannot stand seeing my future, OUR future crumble and break just because of a data center. These data centers are ruining are environment, producing over millions, maybe even billions of carbon dioxide annually. This ruins everything. We can live without AI, we do not need AI. As I highschooler I have many thoughts about this, are they just thinking about their own benefits, money, power, over humanity? MONEY AND POWER WILL DO NOTHING IF GLOBAL WARMING & CLIMATE CHANGE IS IRREVERSIBLE. This cannot be good for us, this risks our health, our planet, our home. I think it's really stupid of how rich people think they are in a higher position than us, think about how they can control everything. They hide everything from us, crimes, theft, even possible murders left as secrets by the rich. You can never, I MEAN NEVER, trust them. So many incidents are happening right now, politics used to be boring. Don't make another data center, for our own good. Replant trees, fix our mistakes before it's too late. Eat the rich before the rich eat you.
