

Evalynn Kettering

The air quality permit should be denied. As Bloom Energy has had constant history of illegal dumping of hazardous waste. This does not include the impacts that Project Jupiter will have on the entire New Mexico population. The public should be given 60 days to review and comment. If the permit is denied a hearing needs to be held in Santa Teresa, in both English and Spanish. By approving this permit you are enacting government environmental racism. Perpetuating the notion that us New Mexicans and our land are for sale and expendable. Our lives the life and well being of our land and animals that depend on it, are never for sale! Project Jupiter is masked as bring more opportunities to New Mexico, but when our water supplies are depleted by the second and our air becomes poison, what happens then? What happens when your own people are in hospitals when cancer rates rise. You will leave a scar amongst the community the land and the overall health of New Mexico. A scar that will never heal a scar you created with your own greed. I am not just urging you to decline the Permit I am telling you to decline it. For the well being and safety of all New Mexicans, all including the land and all of its inhabitants.
