No data centers in New Mexico! You will do nothing but pollute our air and take what limited resources we already have! NO TO PROJECT JUPITER AND NO TO DATA CENTERS IN NEW MEXICO. The air quality permit application should be denied! Stop poisoning the Doña Ana County community! The air is already unhealthy, adding your disgusting emissions won't help! This isn't a need for society or our community in New Mexico! Bloom energy has a bad history already of illegal dumping including hazardous waste!! Absolutely don't want or need that here. As a community we vote no! And should you succeed in putting this in place, I promise it won't succeed or last. Our community doesn't quit and won't stand for this. So go ahead and build it, I promise there will be vandalism and destruction! New Mexico doesn't want you here!
