

Anon Rodriguez

Having a data center in an area that already had poor air quality will endanger not just the animal and plant life but as well human life, as a person who had similar symptoms to asthma it can cause me to suffocate me and can affect others and even employers, as our desert is dying this is going to make it worse, and among the public if this permit is given and planet Jupiter is successfully made, this will send a message to new Mexican citizens that the government does not care about the well being of their citizens, this is practical murder, so I plead do not allow this corporation kill us.
