

Kevin Wilson

I do not support Project Jupiter or ANY Data Center taking up any space in the state of New Mexico. Data Centers do not belong in New Mexico. They pollute the air, water, land endlessly. We've heard horror stories of other places that have been grossly affected negatively. Do not sacrifice our beautiful desert full of vegetation and wildlife for AI Data Centers. We don't need it. Mother Nature needs us to protect her. Otherwise in the end we suffer once the ecology around us dies out. We all know this. Do not approve air permits for Project Jupiter or any Data Center. We need our water! Our wildlife need our water! Our wildlife need our desert! Our wildlife need our air! The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably. The air quality permit application should be denied given Bloom Energy's history of illegal dumping hazardous waste. If the permit is not denied, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually. Approving this permit would be government-sponsored environmental racism as residents of Doña Ana County are already disproportionately impacted by environmental pollution.
