I along with many other people believe that this data center is a complete and utter waste of time and New Mexico's land. This money used to fund the data center could be used for so many other purposes and more useful projects that could actually help the local community. This data center provides nothing to help residents of Doña Ana County. This could lead to restrictions of the usage of water imposed on the local residents and can/will pollute the local environment, potentially causing pulmonary issues and other illnesses. Please reconsider the construction of this data center and put the thoughts of the beautiful community before profit.

The public should be given an additional 60 days to review and comment on the air quality permit so community members can participate equitably.

The air quality permit application should be denied outright given Bloom Energy's history of illegal dumping hazardous waste. Approving this permit would be government-sponsored environmental racism directed at residents of Doña Ana County.

If the permit is not denied outright, a public hearing needs to be held in Santa Teresa, in both English and Spanish, with an option to participate virtually.
